LEGAL DESCRIPTION OF AUTHORIZED PLACE OF USE

Lot SP 26-89-1: That portion of the SE¼SW¼ of Section 22, T. 37 N., R. 38 E.W.M., in Stevens County, Washington, described as follows: Commencing at the Columbia River Reservoir Boundary Marker No. 9 which is a 1" steel pin, as shown on print sheet No. 1827, Columbia River Reservoir, Grand Coulee Dam; thence S. 07°43'17" E. for 56.63 feet, more or less, to the west line of the Burlington Northern Railroad right of way; thence south along the west line of said right of way to a point 525 feet north of, as measure along the Burlington Northern Railroad right of way, the south line of the SE¼SW¼ of said section 22; thence N. 82°17' W. to the Columbia River Reservoir Boundary; thence N. 7°43' E. to the true point of beginning.

Proposed Works

A ¾ hp submersible pump with appropriate screened intake, 1¼-inch supply line, and lawn irrigation system.

Development Schedule

BEGIN PROJECT	COMPLETE PROJECT	PUT WATER TO FULL USE
May 1, 2013	May 1, 2014	May 1, 2015

Measurement of Water Use

How often must water use be measured?	Monthly
How often must water use data be reported to Ecology?	Annually (Jan 31)
What volume should be reported?	Total Annual Volume
What rate should be reported?	Annual Peak Rate of Withdrawal (cfs)

## Provisions

### Water Service Contract

Use of water under this permit or certificate is contingent upon the applicant's compliance with a water service contract with Ecology for recovery of costs associated with the Lake Roosevelt Incremental Release Project. Failure to comply with the terms of the water service contract will result in cancellation of the permit or revocation of the certificate.

### Measurements, Monitoring, Metering and Reporting

An approved measuring device must be installed and maintained for each of the sources identified by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use", WAC 173-173, which describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition the Department of Ecology for modifications to some of the requirements.

Recorded water use data may be submitted via the Internet. To set up an Internet reporting account, contact the Central Regional Office. If you do not have Internet access, you can still submit hard copies by contacting the Central Regional Office for forms to submit your water use data.

### Water Use Efficiency

The water right holder is required to maintain efficient water delivery systems and use of up-to-date water conservation practices consistent with RCW 90.03.005.

### Schedule and Inspections

Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.

### General

The water source and/or water transmission facilities are not wholly located upon land owned by the applicant. Issuance of a water right permit by this Department does not convey a right of access to, or other right to use, land which the applicant does not legally possess. Obtaining such a right is a private matter between applicant and owner of that land.

This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or to give notice to the Department of Ecology on forms provided by that Department documenting such compliance.

Given under my hand and the seal of this office at Yakima, Washington this 8th day of January, 2013.
